2017

Life can be messy. And sometimes it's downright gross ~ runny noses, throwing up in class, warts, and lunches that if left too long in the fridge end up looking and smelling like a science experiment. Fortunately for us, there's something we can do!

In this hilarious and helpful new series, three young primary school teachers take the "Ewww" out of these disgusting, if every-day, phenomena. Curious, energetic, and keen to tackle any challenge, our three experts help kids understand if the disgusting thing in question is truly YUCK! Or by looking closer and understanding of the nature of it, isn't quite so bad after all.
