

Roommates

YOUTH

Roommates explores the story of four girls and four boys in the second last year of high school who share the only mixed lodgings in their school residence. Over this year of co-habitation, we witness the bonds formed between our eight residents and their entourage, and the alliances some form, even if only to lay claim to the remote control on a particular night, as well as friendships and love affairs that blossom and fade. In short, we share in the genesis of a band of fast friends for whom their time spent at Des Sables High School will always figure among the best days of their lives.
